Igua® Control, Brazil, chooses Vectair P-Screen® Urinal Screens

## VECTAIR P-SCREEN®

Igua® Control, based in Brazil, are a supplier of products and services for water treatment, equipment, air control and many other market segments.

**Their client was having problems with clogging in almost all the urinals. Every 8 months, they had to manually open the urinals to unclog them.**

**The Company were searching for a product that could remove bad smells, stop splash back but most importantly, unclog the urinals.**

Igua® Control found & chose Vectair P-Screen®.

Igua® Control have a commitment to their customers that includes offering their customers cost effective, functional methods in the Industrial and Institutional markets without violating their five-pillar values; Preserve the environment and promote sustainable growth; maintain quality services with better cost; provide chemicals with proven efficiency; enable dosing automation and purges, among others; provide recognized analytical monitoring.

They were aware of problems with clogging in urinals from their clients, in particular one client, whose urinals needed manual unclogging, which came at a cost- both economically and through labor time.

Igua® Control had used regular urinal screens previously, just to help keep the bad odors away. These provided no help or protection against urinal clogging. So, they decided to search for any solution that could not only help help remove bad odors and splash back, but help reduce or prevent clogging in urinals - saving money and time not having to manually repair urinals.

They came across Vectair P-Screen®.

Igua® Control were especially drawn to the Vectair P-Screen® due to its ability to last up to 60 days, helping with clogging through an active central core and also providing a fragranced ambience. This allowed them to save money and time on labor resources.

While there are six fragrances to choose from, the Company opted for the Clove & Cardamom fragrance to help in mall restrooms.

## Smell the difference

Spicy clove and cardamom entwine with an exotic cinnamon and wintergreen. This leads through to a twist of spearmint, jasmine and fresh eucalyptus leaves.

Active central core.

Igua® Control, Brazil, chooses Vectair P-Screen® Urinal Screens

Vectair P-Screen® is the world's first triple action urinal screen, offering 60 days splash back protection with a dual fragrance & enzyme protection (active central core).

The active central core in the Vectair P-Screen® urinal screen is not only designed to reduce bacteria, but also provides a secondary fragrance for urinal areas.

Vectair P-Screen® helps to prevent blockages in urinals & uric salt build up in pipes. The 60 day urinal screen is VOC exempt and recyclable, using no propellants.

The deep bubble & bristle design helps to provide optimal splash back protection and scent delivery with a large surface area.

Vectair P-Screen® also has protected design rights.

Contains naturally-occurring bacteria which produce enzymes to degrade organic matter, eliminating bad smells. This also reduces organic scale build-up, ensuring that uric salt is made more soluble, broken down and made easier to flush away, helping to reduce urinal clogging.

Vectair P-Screen® is part of 'The Professional Passive Program™', providing a harmony of fragrance through matching fragrances that are also found in the Airloop® Toilet Bowl Clip & Vectair Wee-Screen® 30 Day Urinal Screen.

Six fragrances are available; Citrus Mango, Clove & Cardamom, Kiwi & Grapefruit, Lavender & Geranium, Linen Breeze and Marine Musk.

*“Vectair P-Screen® helped with saving money & time”*

*“We tested Vectair P-Screen® for 60 days (in a mall), & still the client reported benefits. They said that the urinal clearly unclogged, judging by the flow (of water) through the urinal.” Renan Nagy, Technical Manager, Igua® Control, Brazil.*
